

# DRINKING WATER SOLUTIONS

Your Partner in Cool.

**AQUA  
COOLER**

# AQUA COOLER

Australia's leading drinking water solution brand.

## About us

Aqua Cooler is an Australian owned and operated business, offering expert solution advice, nationwide technical support, and installation services of drinking water products across Australia and New Zealand. Aqua Cooler Headquarters are in Brisbane, Queensland, along with warehousing and distribution arrangements in Perth, Western Australia.

Our serviced industries include education, transport, commercial buildings, transportation, construction sites, healthcare, fitness and sports facilities, domestic homes and more.

## Products

Our range includes drinking fountains, bubblers and bottle fillers, public drinking fountains, mains-connected and bottle top water coolers, under bench systems for home and offices, remote water systems, wall mounted drinking troughs, water filter systems and associated accessories.

## Our Values

We are a customer-first organization, putting customer satisfaction at the forefront of how we conduct business. We aim to improve life through water. We believe in never being difficult to deal with and being there for our customers when they need us the most.

## Our History

Aqua Cooler Pty Ltd is a proud Australian family-owned company with a history dating back to 1946 when we operated as a contractor in the refrigeration sector and later as a manufacturer of packaged water chiller units.

In 1979, Sam Hort (Aust.) Pty Ltd was acquired, which commenced production of Drinking Water Fountains in 1953. With the rapidly growing spring water market we commenced production of bottled water coolers in 1989, and now distribute a wide range of drinking water solutions across Australian and New Zealand.

*"The key to our success lies in our ability to provide expert advice to our clients, fast response to sales, short lead times and quality products."*

# DRINKING FOUNTAINS

The M Series and WM Series of drinking fountains are the figureheads of the Aqua Cooler product line up. Their unmatched durability, reliability and performance make them a favourite across a range of industries. The stylish, unassuming design suits almost any location and the IP33 rating means they can be installed where other fountains can't.

## M Series

### Heavy-duty, mains-connected drinking fountains

The M Series is a sleek, mains-connected water fountain with a heavy-duty build. The tank is made from industrial-grade stainless steel ensuring the fountain will meet any demand.

#### KEY FEATURES

- Industrial grade 304 stainless steel tank and robust construction
- Polished stainless steel top
- Front panel removes for ease of servicing
- Optional stainless steel cabinets
- Simple filter changes for filtered units
- Adjustable, tamper-proof, non-squirt bubbler and glass filler
- IP33 rating suitable for outdoor use (see page 7)

The M Series is designed with an easily removable front panel giving instant access to all components and controls. Hassle-free filter changes and services can be done without disconnecting the plumbing.

Available with or without glass filler tap, in filtered or unfiltered configurations with a stainless steel or dark grey powder coat finish. This robust water dispenser fits perfectly in a multitude of places, including offices, worksites and gyms.

Filtered models feature a compact, easy-to-replace filter that removes taste, odour and chlorine. The proprietary carbon-block filter has greater density than other products with a 2-micron filtration pad to prevent carbon and sediment bypass. The water inlet connection is a 1/2" MBSP and the drain is a 40mm female PVC socket.

#### Model Selection Chart

Cabinet	Filtered	10 Litres per hour		26 Litres per hour	
		1-20 people*			21-80 people*

# WM Series

## Wall-mounted mains-connected drinking fountains

The wall-mounted WM Series is especially designed for areas where floor space is restricted. They can be mounted at any height, making them ideal for children or people in wheelchairs.

### KEY FEATURES

- Industrial grade 304 stainless steel tank and robust construction
- Polished stainless steel top
- Front panel removes for ease of servicing
- Adjustable, tamper-proof, non-squirt bubbler and glass filler

Mains connected, and with a heavy-duty build, this drinking fountain is built with 19L/hour chilling capacity, and with this system is perfect for installation in offices, worksites, workshops, gyms and more.

The WM Series is designed with an easily removable front panel that gives instant access to all components and controls. Hassle-free filter changes and services can be undertaken without disconnecting the plumbing.

Available with or without glass filler tap in a beautiful dark grey powder coated finish.

# Ingress protection

## What it means for water fountains in the construction industry

The joint Australia/New Zealand Standard (AS/NZS 3000:2018) has been prepared by the Joint Technical Committee EL-001, Wiring Rules to provide uniform essential elements that constitute the minimum regulatory requirements for safe electrical installation.

AS/NZS 3000:2018, published on 26 June 2018, allowed for a six-month transition period.

Section 4.1 of the Standard stipulates that electrical accessories installed outside a 30-degree arc from shelter shall have a minimum degree of ingress protection of IP33.

### Area under an overhang requiring accessories to be a minimum of IP33 (side view)

That means any water fountain with a lower IP rating installed without the shelter shown above is in breach of the Standard. Worksites risk being shut down for this breach of the Standard.

Aqua Cooler's flagship product, the M Series free-standing drinking fountain, has achieved a rating of IP33\*. We offer a 12-month comprehensive warranty, regardless of whether it is installed in uncovered conditions, followed by a 24-month parts-only warranty.

(\*M Series ingress protection tested by Ex Testing and Certification Pty Ltd, report # REP18122-01, 26/11/2018)

*"The M Series is a must for work sites that require cold water and don't have the luxury of undercover space."*

### Model Selection Chart

	Bubbler	Bubbler & glass filler
Powder-coated	WM4	WM5

A filter kit can be ordered to be mounted externally to the fountain if required. The WM5 model is supplied with fittings to temporarily remove bubbler for reinstallation at a later date. This will enable the drinking fountain to be used as a glass filler only unit.

# BUBBLERS AND BOTTLE FILLERS

Oasis bubblers and bottle fillers come in a wide range of configurations designed to suit varied applications. We have contactless options for both bubblers and bottle fillers to enable hands-free dispensing and optional advanced UVC-LED filtration at point of dispense.

## A Solution For Every Application

Water is vital for life and Aqua Cooler's partnership with Oasis International means we have a solution for every application. Whether it is wall-recessed or surface-mounted bubblers or bottle fillers, we have a variety of options to suit your workplace, education campus, gym or healthcare facility. Our bubbler and bottle filler options include a choice of manual or sensor dispensing to cater for the ever-changing world.

### Education

Many students do not have access to refill stations for their water bottles. Be the educator that cares; make the change by providing them with an Oasis hydration solution.

### Workplaces

With more people than ever bringing their water bottles to work, choose from our contactless range of bottle fillers to avoid cross-contamination. Our antimicrobial silver and copper surfaces kill bacteria and maintain safe working environments.

### Transport

Studies have shown travellers have few facilities to refill water bottles when they need it most. Be the leaders in caring for the welfare and hydration of thirsty travellers. Provide them with an Oasis hydration solution.

### Fitness & Sports Facilities

Whether you're a gym enthusiast pumping weights, or a sports fanatic chanting loudly, you need rehydrating. Aqua Cooler offers a multitude of options for fitness and sport facilities.

### Healthcare

Like health, water is often taken for granted. Ensure your healthcare facility patients and visitors are consuming safe water with Oasis contactless bottle fillers.

### Configuration Options

Our bubblers and bottle fillers are available in a wide range of configurations to suit a variety of applications, including contactless options to enable hands-free dispensing, and pre-filter kits.

# Surface-Mounted Bubblers

## Wall-mounted mains-connected bubblers

The VersaCooler Series is a wall-mounted water bubbler offering refrigerated drinking water with a contactless and vandal-resistant option.

Configuration options:

AC-P8ACTY-ASM

AC-PV8ACY-ASM

### KEY FEATURES

- Stainless steel top and heavy duty frame
- High efficiency cooling system (on refrigerated models) using R-134a refrigerant
- Built-in 100-micron strainer stops particles before they enter the waterway
- Waterways are lead-free in materials and construction
- Flexible, one-piece water saver bubbler guard
- Single push button on vandal resistant models, along with a contactless option
- External stream height adjustment
- Filter available as optional accessory.

The heavy-duty galvanised steel frame makes the unit extra durable, perfect for high volume applications. Also featuring a 100-micron strainer to stop particles entering the lead-free waterway, and with a vandal-resistant & contactless design, the VersaCooler is perfect for schools and other public areas.

VersaCooler fountains use R-134a refrigerant and have an efficient, high-performing refrigeration system.

# Semi-Recessed Bottle Fillers

## Mounted mains-connected bottle fillers

Our semi-recessed bottle fillers offer refrigerated drinking water with automatic dispensing.

Configuration options:

### KEY FEATURES

- Heavy-duty steel frame with a stainless steel finish
- Space saving surface mount frame assembly
- Electronic automatic dispense
- Integrated bottle counter and filter monitor
- Built-in 100-micron strainer stops particles before they enter the waterway
- Waterways are lead-free in materials and construction
- High efficiency cooling system and refrigerant R-134a
- Built-in panel locks for easy access to chiller and filtration
- A wall cavity is required behind the bottom half to fit the chiller

Oasis semi-recessed bottle filler units offer refrigerated drinking water with automatic, hands-free dispensing mechanisms. Featuring a 100-micron strainer to stop particles entering the lead-free waterway and a heavy-duty galvanised steel frame making the unit extra durable. Perfect for high-volume applications. All refrigerated fountains use R-134a refrigerant and have an efficient, high-performing refrigeration system.

All Oasis bottle fillers are made with proprietary Freshfield technology. Freshfield harnesses the natural bacteria-fighting power of silver by infusing it into a poly compound on moulded parts of the alcoves.

*Please note: For refrigerated models, the unit is fixed to the surface, but a wall cavity is required to fit the chiller behind the lower half of the unit. Alternatively, this can be mounted remotely and water lines run to the unit. Contact us for details.*

# Surface-Mounted Bottle Filler

## Wall-mounted mains-connected bottle filler

This refrigerated bottle filler is perfect for those high traffic areas. With a contactless, touch-free activation - there are no fears of cross-contamination in a touch sensitive environment.

Configuration options:

### KEY FEATURES

- Touch free, electronic automatic dispense
- Heavy-duty steel frame with a stainless steel finish
- Integrated bottle counter and filter monitor
- Built-in 100-micron strainer stops particles before they enter the waterway
- Large alcove to fit most sports bottles
- Energy-efficient LEDs illuminate alcove and aids bottle filling
- Built-in drain - no drip tray to empty
- Access through side panel for easy maintenance
- High efficiency cooling system and refrigerant R-134a

Our surface-mounted bottle filler units offer refrigerated drinking water with touch-free, electronic automatic dispense mechanism. Perfect for high-volume applications, this fountain utilises R-134a refrigerant with a high-performing refrigeration system.

A 100-micron strainer stops particles entering the lead-free waterway and a heavy-duty galvanised steel frame making the unit extra durable. This bottle filler also comes with a built-in bottle counter, filter monitor and programmable time-out feature.

All Oasis bottle fillers are made with proprietary Freshfield technology. Freshfield harnesses the natural bacteria-fighting power of silver by infusing it into a poly compound on moulded parts of the alcoves.

## Convert your existing Bubbler to a Surface Mounted Bottle Filler

Using our easy conversion kit (AC-NNEBFPG), existing bubbler infrastructure easily converts to a contactless bottle filler in the same style as the our refrigerated, compact surface mounted, contactless bottle filler. A simple upgrade, with maximum impact to your facilities drinking water offering.

### KEY FEATURES

- Convert a water cooler to bottle filler in just minutes
- Intuitive, hands-free operation
- Bottle filler replaces bubbler, existing top and button activation
- Retrofits to the existing water cooler without removing it from the wall
- Re-uses existing refrigeration, plumbing and power source

# Surface-Mounted All-In-One

## Wall-mounted mains-connected combination unit

The VersaFiller Series comes in a wide range of configurations, including single and split-level designs, both of which feature bubblers and bottle fillers.

Configuration options:

### KEY FEATURES

- Stainless steel top and heavy duty frame with galvanized or stainless steel option
- High efficiency cooling system and refrigerant R-134a
- Built-in 100 micron strainer stops particles before they enter the waterway
- Waterways are lead free in materials and construction
- External stream height adjustment on bubblers
- Hands-free bottle filler with programmable shut off timer (hands free version only)
- Integrated bottle counter and filter monitor.

VersaFiller Series drinking water fountains come in a wide range of configurations, including single and dual level designs. With an optional upgrade to a vandal-resistant design, the VersaFiller is perfect for schools and other public areas. All VersaFiller fountains use R-134a refrigerant and have an efficient, high-performing refrigeration system.

All Oasis bottle fillers are made with proprietary Freshfield technology. Freshfield harnesses the natural bacteria-fighting power of silver by infusing it into a poly compound on moulded parts of the alcoves.

# Wall-Recessed Hydration Stations

## Wall-recessed mains-connected combination unit

Wall-recessed hydration stations include a bottle filler, and a vandal-resistant push button mechanism for using the bubbler.

Configuration options:

### KEY FEATURES

- High efficiency cooling system and refrigerant R-134a
- Stainless steel top and heavy duty steel frame
- Electronic automatic dispense (hands-free model)
- Integrated bottle counter and filter monitor (hands-free model)
- Built-in 100 micron strainer stops particles before they enter the waterway
- Waterways are lead free in materials and construction
- Built-in panel locks for easy access to chiller and filtration
- Vandal resistant mechanical push button

Activated by a vandal-resistant mechanical push button, the basin is designed to eliminate splashing and standing water. The built-in, electronic, recessed bottle filler contains a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surface from discolouration, odours, and degradation. You have optional filtration for taste, odour, and chlorine reduction. The cooling system uses the highly efficient R-134a refrigerant.

All Oasis bottle fillers are made with proprietary Freshield technology. Freshield harnesses the natural bacteria-fighting power of silver by infusing it into a poly compound on moulded parts of the alcoves.

AC-M8WREBFY-ASM

# Wall-Recessed Bottle Fillers

## Wall-recessed, mains-connected bottle filler

This wall-recessed, plumbed-in bottle filler comes with hands free dispensing and can produce 30L/h of cold drinking water.

Configuration options:

### KEY FEATURES

- High efficiency cooling system and refrigerant R-134a
- Stainless steel finish with heavy duty steel frame
- Built-in 100 micron strainer stops particles before they enter the waterway
- Waterways are lead free in materials and construction
- Optional filtration system for taste, odour and chlorine reduction
- Sensor activated water flow

These wall-recessed bottle fillers are refrigerated, dispensing 30L/H with hands-free dispensing mechanisms and featuring a 100-micron strainer to stop particles entering the lead-free waterway. The heavy-duty galvanised steel frame makes the unit extra durable, perfect for high-volume applications. All refrigerated fountains use R-134a refrigerant and have an efficient, high-performing refrigeration system.

All bottle fillers are made with proprietary Freshield technology. Freshield harnesses the natural bacteria-fighting power of silver by infusing it into a poly compound on moulded parts of the alcoves.

# Free Standing Bottle Fillers

## Free standing, mains-connected, bottle filler units

The Bottle Filling Station is perfect for those high traffic areas. With a contactless, touch-free activation - there are no fears of cross-contamination.

Configuration options:

### KEY FEATURES

- Electronic automatic dispense
- Integrated bottle counter and filter monitor
- Built-in 100-micron strainer stops particles before they enter the waterway
- Waterways are lead-free in materials and construction
- High efficiency cooling system and refrigerant R-134a
- Built-in panel locks for easy access to chiller and filtration
- Options for interior and exterior installations
- Sleek free standing modern design

These free standing bottle fillers include an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer.

Moulded components contain Freshield, which utilises a silverbased antimicrobial compound that reduces the growth of microorganisms and mildew to protect the surfaces from discolouration, odours and degradation.

Complies with ANSI A117.1 and ADA. Shall comply with all relevant CE directives (LVD , EMC, RoHS). Shall comply with ANSI/NSF 61.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices. The sloped top prevents rubbish being placed on the unit. The unit can be installed right against the wall to save space.

# PUBLIC DRINKING FOUNTAINS

Aqua Cooler is proud to partner with Urban+ to offer a range of outdoor drinking fountains. Designed to meet your requirements in the harshest of environments, these stylish fountains are perfect for use in parks and recreational areas.

Looking to save money and the environment? Aqua Cooler is proud to support Urban+ with its unique Restore + Refill program. Their re-crafted water fountain initiative offers customers a choice to refurbish worn-out Urban fountains, where possible, rather than buy new. That stops fountains entering landfill and saves customers money. By encouraging this different thinking and change in behaviour, Urban is striving to make a difference. Join them to reduce, restore, reshape and recycle.

## SU600 & SU650 Series

### Sturdy Outdoor Water Fountain Range

The SU600 and SU650 are a family of strong and robust fountains perfect for schools and outdoor areas. Australian-made and fully WaterMark approved, the range can house an additional bottle filler with integrated catchment tray for on-the-go refills. The range is available in two standard colours or you have the option to retain the body's industrial galvanised finish.

Sturdy and resilient as it dispenses beautiful crisp water, Aqua Cooler's new SU600 and SU650 water fountains are at home anywhere in the outdoors. A sleek, tall profile keeps the SU600 and SU650 out of the way in busy thoroughfares while it remains an icon of hydration whether you're in the schoolyard, the park, or even just between meetings in an office complex.

#### Dimensions

- Total height: 1000mm
- Width: 275
- 5mm steel

#### KEY FEATURES

- External bottle filler and catchment tray (SU650 only)
- Vandal resistant 316 stainless steel security screws
- Stainless steel basin
- Available in hot dipped galvanised or powder coating (2 colours)

SU650	Includes External Bottle Filler & Catchment Tray	Galvanised Powder Coated

# Apollo 280

## Outdoor Drinking Fountain with Bottle Filler

The Apollo 280 (A280) drinking fountain features a robust design with both bubbler and bottle refill outlets. With its custom-designed stainless-steel basin and feature front panel, sand/debris resistant activator button, WaterMark certification, and AS1428 compliance options, the A280 is practical, stylish and complements any contemporary urban streetscape or park setting.

The A280 outdoor drinking fountain is the perfect choice for all your hydration needs and the eco-friendly sustainable choice for now and the future.

### KEY FEATURES

- Australian made
- 316 Stainless steel front panel, bubbler, basin and catchment tray (optional)
- Strong 8mm mild steel construction
- Easy water activation system
- Unique designed sand/debris resistant activator button
- Bottle refill outlet as standard
- Disabled accessible (complies with AS1428 with longer basin and reduced height options)
- Vandal resistant
- Easy installation fixings and easy access for maintenance
- Customisable with many options
- Powder coated in premium Dulux steel shield coating finish
- Full parts and technical back up service

### Optional extras

- Tap and dog bowl
- Tap or maintenance tap available
- Catchment tray
- Longer basin for AS1428 compliance
- Complete stainless steel model available
- Water filter
- Logo, motif or plaque
- Side protection panels

# PF400 & PF450

## Pet Friendly Drinking Fountains

The PF400 and PF450 are strong, robust fountains perfect for dog off-leash areas, council parks, and outdoor environments where access to water for dogs is required. Both models have water bubblers for people and a self-returning tap and easy tipping bowl for dogs as standard. Both models have an additional water bottle refill option for pet owners while exercising or enjoying the outdoors with their furry friends.

The new, contemporary, stylish PF450 comes with interchangeable side panels that can be customised with your graphics, logo or message.

### KEY FEATURES

- Australian made
- Strong mild steel construction
- 316 stainless steel tippable dog bowl
- Fully welded tap mount socket
- Bottle refill as option
- Vandal resistant
- Easy installation and easy access for maintenance
- Powder coated in premium Dulux steel shield coating finish
- Full parts and technical back up service

# BF200

## Refill Station

Greater consciousness of plastic's environmental impacts means the BF200 water bottle refill fountain is ideal for today. Made from heavy duty steel, the BF200 has WaterMark certification and gives users practical access to easily refill their drink bottles. Easy, convenient and with an optional filter, the BF200 helps to reduce the need for single-use plastic bottles and promotes health and wellbeing.

The BF200 bottle refill station is the perfect choice for all your hydration needs and the eco-friendly sustainable choice for now and the future.

### KEY FEATURES

- Australian made
- 316 stainless steel panel fixings and catchment tray (optional)
- Strong 8mm mild steel construction
- Easy water activation system
- Bottle refill as standard
- Vandal resistant
- Easy installation fixings and easy access for maintenance
- Customisable with many options
- Powder coated in premium Dulux steel shield coating finish
- Full parts and technical back up service

### Optional extras

- Tap and dog bowl
- Water bubbler
- Tap or maintenance tap available
- Catchment tray
- Water filter
- Logo, motif or plaque

Tap and Dog Bowl

Catchment Tray

# BF200W

## Wall-Mounted Bottle Refill

The BF200W wall-mounted bottle refiller is compact, strong and robust. It is easy to use and ideal for schools, day care centres, gymnasiums and outdoor recreational areas that require access to fresh water. This wall-mounted refill station is the perfect solution to accompany existing water bubblers. Urban's outdoor wall-mounted fountain has WaterMark certification and gives users access to water so they can refill their bottles, encouraging reduced single-use plastic waste. Easy, convenient and with an optional filter, the BF200W promotes health and wellbeing by encouraging drinking of fresh water.

The BF200W bottle refill station is the perfect choice for all your hydration needs when a compact outdoor solution is required.

### Dimensions

- Total height: 1050mm
- Width: 180mm x 250 mm
- 8mm steel one piece heavy duty construction

### Optional extras

- Catchment tray
- Water filter
- Logo, motif or plaque
- All stainless steel model available
- Compact size
- Full stainless steel finish

### KEY FEATURES

- Australian made
- 316 stainless steel panel fixings and catchment tray (optional)
- Strong 8mm mild steel construction
- Easy water activation system
- Bottle refill as standard
- Available in two additional models, BF200WSH (Short), BF200WC (with catchment tray)
- Vandal resistant
- Easy installation and easy access for maintenance
- Powder coated in premium Dulux steel shield coating finish
- Full parts and technical back up service

# BF200WM

- Wall mounted
- Available with two, three or four taps
- Ideal for schools and clubs
- Designed to fit above drinking troughs
- Refill banner sign optional
- Drinking trough not included. (sold separately)

# REMOTE WATER SYSTEMS

These industrial grade water systems are used to remotely supply chilled drinking water to drinking troughs or other outlets as required. Aqua Cooler's range includes units capable of supplying between 30L/h and 110L/h of chilled water, making them perfect for schools and workplaces.

## Sonata Series

Sonata Series systems remotely supply chilled drinking water to faucets or fountains. Available in two different configurations to suit your application, be it a schoolyard bubbler or workshop fountain.

### KEY FEATURES

- Three models available to suit a variety of applications
- Waterways are lead-free in materials and construction
- Constructed from heavy-duty galvanised steel
- High-efficiency cooling tank and coil
- Refrigerant R-134a for high ambient conditions

Sonata remote drinking water systems deliver either 30L/h, 45L/h or 75L/h (model specific) of water at 10°C cooled from 27°C inlet water at 32°C ambient. Pressure regulating valves are required with water pressures above 5 bar.

### Model Selection Chart

Model	Rated capacity	Compressor HP	Full load amps	Rated watts	Cabinet finish	Net weight (approx.)
SMC30	30.0 L/h	¼	4.8 A	550 W	Galvanised Steel	24 kg
SMC45	45.0 L/h	¼	5.4 A	620 W	Galvanised Steel	24 kg
SMC75	75.0 L/h	½	3.7 A	814 W	Galvanised Steel	26 kg

## PT30 Series

The Aqua Cooler PT30 remote storage features a large storage tank of 120L and can chill water down to 10°C from 27°C in 32°C ambient at a rate of 110L/h. Perfect for connecting to drinking water troughs in education environments. Also can be used to pre-chill water for ice machines or in other commercial environments.

### KEY FEATURES

- Constructed from heavy-duty galvanised steel
- High capacity storage to meet demand
- WaterMark compliant
- Refrigerant R-134a for high ambient conditions

### Model Selection Chart

Model	Rated capacity	Compressor HP	Full load amps	Rated watts	Cabinet finish	Net weight (approx.)
PT30	110.0 L/h	½	4.2 A	650 W	Galvanised Steel	35 kg

# WALL MOUNTED DRINKING TROUGHS

Aqua Cooler is proud to partner with 3monkeez, an Australian owned and operated company, to offer a range of stainless-steel drinking troughs perfect for use with our remote water systems.

## Drinking Trough PWD

With outlet fittings configured to your requirements and a 60mm boxed splashback, this drinking trough is ideal for many applications.

The internal and external radius corners are designed for safety and easy cleaning. A 60mm cavity in the splashback enables tapware to be easily installed with no rear wall penetrations. This trough is perfect for educational facilities, public amenities, factories and more.

### KEY FEATURES

- Constructed from 1.2mm 304 grade satin stainless steel
- Left or right hand drain outlet available
- Available in 6 lengths as required, or ask us about custom jobs
- Radius external and internal corners for safety and easy cleaning
- 900mm, 1200mm, 1500mm, 1800mm, 2400mm and 3000mm available off the shelf
- Bubbler fittings include silicone mouthguard
- Choice of lever handle (for young children) or push button dispensing on bubbler and bottle filler
- Simply choose your length of trough, then add your outlets to suit. Mix and match to best meet your needs
- Outlets are available pre-plumbed or just on a supply basis for DIY installs.

Suggested mounting height for drinking trough:

- Infant - 550mm
- Primary - 700mm
- Secondary - 900mm

Suggested mounting height for wash trough:

- Infant - 550mm
- Primary - 650mm
- Secondary - 700mm

# WATER COOLERS

Thousands of customers rely on the Aqua Cooler brand to supply cold, filtered water to their waiting rooms, lunchrooms, homes, gyms, schools and offices. That's because Aqua Cooler water coolers offer incredible quality and value. Stylish, modern designs, coupled with the reliability for which all Aqua Cooler products are renowned, make them the perfect choice for your drinking water needs.

## Odyssey Series

### Bottled water coolers

The Odyssey Series offers unrivalled value in bottled ambient and cold drinking water dispensers. The modern cooler is the perfect unit for family homes, renters and small offices all year round.

#### KEY FEATURES

- Stylish front facade made from high quality durable plastic, coupled with steel side panels for strength
- Easy-to-use taps, only one hand required
- Food-grade, stainless steel water contact tubes
- Durable polypropylene, self-closing taps
- Easy-to-clean, removable drip tray
- 12-month standard warranty and additional 24-month refrigeration system coverage
- Full range of replacement parts

The Odyssey Series is a free-standing unit available in ambient and cold configurations. The series has a 2.5L tank and is an excellent choice for any application, dispensing 2.5L/H of cold water.

The cooler is created from high-quality materials including food-grade and stainless-steel water contact tubes. The durable plastic, coupled with steel side panels for strength, making this unit perfect for home and small office use.

The Odyssey Series is covered with a 12-month standard warranty and additional 24-month refrigeration system coverage. A full range of replacement parts is available to keep the unit in operation for longer.

## Maximus Series

### Mains-connected water coolers

Maximus is the largest capacity commercial water cooler range available on the Australian market. No other cooler in its class offers the same level of performance making Maximus the ideal choice for high-demand areas such as offices and workshops.

#### KEY FEATURES

- Highest capacity water cooler available in Australia
- Stainless steel side panels and corner pieces for heavier-duty applications
- Durable polypropylene, self-closing taps
- Food-grade, stainless steel water contact tubes
- Easy-to-clean, removable drip tray
- 12-month standard warranty and 36-month compressor warranty
- Full range of replacement parts

With an unprecedented 14L tank, Maximus dispenses up to 6.5L/H of cooled water. Maximus is a free-standing unit available in cook and cold or hot and cold configurations.

The powder-coated steel side panels and corner pieces make this unit perfect for heavy duty applications such as workshops. Coupled with our 12-month standard warranty, additional 24-month refrigeration circuit warranty and full range of replacement parts, the Maximus is a powerhouse of water cooling.

# COUNTERTOP SYSTEMS

Perfectly suited to fit any table, bench or countertop where you need refreshing, filtered water, Aqua Cooler's Countertop Water Systems offer the perfect options to suit any need. From small chilled glasses of water at home, to instant hot water and stylish designed units, there is a countertop system ideal for your space.

## Odyssey Series

### Countertop water cooler

The Odyssey Series offers unparalleled value in bottled water coolers in both cook-and-cold and hot-and-cold configurations

The stylish Odyssey Countertop Water Cooler brings the ultimate flexibility to your home benchtop drinking water options. These convenient systems can either be used with refillable filter bottle or with pre-filled spring water bottles purchased from spring water companies.

Perfect for home and small office applications, the 2.0L cold tank cools down fast, ensuring you always have access to fresh, chilled drinking water. Our hot and cold model also dispenses water perfect for your cup of tea or noodles.

Available in;

- Hot & Cold – The perfect mix of hot water for making coffee/tea and chilled water for keeping refreshed.
- Cook & Cold – Chilled drinking water and Cook/Ambient temperature water ideal for cooking and other home applications.

## Mini Cooler

### Benchtop Filtered Water

Stay hydrated with this handy 8.5L capacity Mini Cooler Benchtop Water Cooler.

Perfect for low volume home applications, the 1L cold tank cools down fast, and the carbon filtration system ensures you always have deliciously fresh, filtered water at the press of a button.

The Mini Cooler benchtop water system is extremely easy to top up, simply remove the lid and add room-temperature water.

The Mini Cooler's inbuilt electric cooling system dispenses cooled water, which may not be quite as chilled as a classic refrigeration compressor style system but is still perfect for home use throughout the seasons.

## Curve Series

### Instant hot & cold water dispenser

Enjoy water any way you like with this beautifully designed Curve Countertop Instant Hot & Cold-Water Dispenser.

This easy-to-use system features three pre-set temperatures for great tasting hot, ambient and chilled water – fast! Making a warming cup of tea or keeping refreshed and hydrated on hot days has never been simpler, and the ambient water option give you the flexibility to dispense room-temperature filtered water perfect for drinking, cooking or other small applications.

Fitted with a UVC LED filtration system, means you'll always have fresh, filtered water at hand. Paired with water shortage smart reminders, offering boil-dry protection and notifications to refill your tank means you can continue enjoying the Curve system.

With no plumbing required, the sleek and compact Curve Countertop system is ready to plug in and use on your kitchen benchtop or in your home office. The convenient 3.5L water tank is easy to fill, making it a great choice for those who can no longer lift heavy water bottles/kettles.

# UNDER BENCH

Aqua Cooler under bench chillers sit out of sight and deliver a steady supply of chilled water to a tap or faucet above the bench. Under bench units are a great alternative to keeping jugs of water in the fridge and, with an optional filter, can provide chilled and filtered water on demand at any time.

**H<sub>2</sub>O Now**  
BY AQUA COOLER

The H2ONow chiller by Aqua Cooler is an innovative drink system designed to sit out of sight and dispense filtered chilled water on demand.

## KEY FEATURES

- 5L/H chilled water output
- Stylish chilled tap
- Simple to use, with automatic shutdown
- Specifically designed for space-saving, under-bench installation
- Fully insulated to achieve maximum energy efficiency
- Easy filter replacement with a single twist
- 12-months standard warranty
- Full range of replacement parts
