

MINI COOLER

Benchtop Filtered Water

Convenient, cooled & fresh drinking water at home.

KEY FEATURES

- Carbon filtration removes chlorine, taste and odour, lead and copper from your drinking water
- Conveniently sized to fit on your benchtop
- Easy to refill
- Fast cooling system for easy to dispense cooled water
- Red light indicator when water is chilling and blue light indicator when water has fully chilled

Stay hydrated with this handy 8.5L capacity **Mini Cooler Benchtop Water Cooler**.

Perfect for low volume home applications, the 1L cold tank cools down fast, and the carbon filtration system ensures you always have deliciously fresh, filtered water at the press of a button.

The Mini Cooler benchtop water system is extremely easy to top up, simply remove the lid and add room-temperature water.

The Mini Cooler's inbuilt electric cooling system dispenses cooled water, which may not be quite as chilled as a classic refrigeration compressor style system but is still perfect for home use throughout the seasons.

It is recommended to change filters every two months (or if water flow is reduced) to keep your water as fresh and filtered as possible.
